

## SecurWatch® Consultancy Services

# Consultancy & Assessment Service

Secura Consultancy Services will perform an Assessment Service prior to deployment of the SecurWatch® service to help you define the policies needed and ensure a speedy delivery of what the business needs from the outset.

### Key Features

#### Consultancy led approach delivers customised policies to suit your business

By understanding your business objectives, we tailor the policies to deliver exactly what you need and set and document specific KPIs to ensure our ongoing service continues to deliver.

#### Best Practice

We will bring efficiencies and best practices gained from providing the same service to a broad range of customers, thereby maximising the capabilities of the deployed solution and minimising the time you need to spend away from your core business activities.

#### Customised Alerting & Reporting

Tailoring the alerts and reports based on the outcome from the Assessment Service means you will be equipped with the right level of information as soon as the SecurWatch® service is activated thereby ensuring specific information can be acted upon immediately.

### Understanding Your Business Needs

We understand that every business is different so we apply our experience to ask you questions that will quickly provide answers and key facts to enable the SecurWatch® configuration to be tailored to suit specific business needs.

By understanding your business needs at the outset, we're able to ensure we've defined clear KPIs that can then be applied throughout the service in order to measure its success and continue to deliver clear value.

### Minimising The Impact On Your Time

We have the in-depth expertise that comes from providing this service as part of our core business to other customers, meaning you can take advantage of a broader experience to ensure a best practice service without impacting the time you are spending on your own core business activities.

### Seamless Deployment & Go Live

The Assessment Service will produce a detailed Statement of Works document that records our findings and defines tasks, objectives and responsibilities meaning the deployment can be undertaken with the minimal investment of time from you and in a controlled and defined manner specific to your business needs. This then enables us to effectively manage the service from the outset and ensure it immediately starts to deliver a return on the investment.

As we move through the lifetime of the service, business needs can change and so there are quarterly reviews to ensure we keep up with that changing need and tailor the service accordingly.

### About Secura

Secura is a privately held IT Security company dedicated to protecting critical data assets and enhancing corporate and personal productivity. Our aim is to provide peace of mind for our customers so they remain focussed on managing and growing their business.
